Scenario: borrowing a book from the library

Events:

Script event	Webanno label	Example
1. get to the library	get_library	Yesterday I **went_{get_library}** to the library to borrow a book.
2. ask librarian for help	ask_librarian	I **asked_{ask_librarian}** the librarian where the books on nature and birds were.
3. obtain library card	obtain_card	I **filled_{obtain_card}** the form and the librarian **gave_{obtain_card}** me a little plastic library card with my account number and my name on it.
4. use library computer	use_computer	I **did_{use_computer}** a search on one of the library computers.
5. check catalog	check_catalog	The librarian told me that there was a catalog on each computer so I could **look up_{check_catalog}** the books and see if the book I wanted was in the library.
6. note down book shelf mark	note_shelf	I looked up the Dewey Decimal System code for my subject of interest and **wrote_{note_shelf}** it down.
7. get to the shelf	get_shelf	Then I **found_{get_shelf}** the aisle I was looking for.
8. look for the book in shelf	look_for_book	I **searched_{look_for_book}** the books until I found the one I was **looking for_{look_for_book}**.
9. find/take the book	take_book	I **took_{take_book}** the book and went to the check-out area.
10. browse new releases	browse_releases	I also quickly **browsed_{browse_releases}** the new releases shelves.
11. wait	wait	Last time I ordered a rare book and had to **wait_{wait}** for it at the special desk.
12. go to check-out desk	go_check-out	I took the book and **went_{go_check-out}** to the check-out area.
13. show library card	show_card	I **showed_{show_card}** the librarian my card and gave her the book I wanted to borrow.
14. register the book	register	She **scanned_{register}** my card and **registered_{register}** the book.
15. get the receipt	get_receipt	Then I **got_{get_receipt}** a receipt with a due date on it.
16. return book	return_book	I had to **return_{return_book}** the book after three weeks.

17. leave library	leave	I put the book into the knapsack and **headed**_{**leave**} to the exit.

Participants:

Participant & Webanno label	Script event
